

End Points

Year 6 – Biomes in changing climates

What I know and can explain

- I know how energy is distributed in the world, in particular coal
- I know where coal is distributed and I can explain why countries use coal for energy
- I know the effects of burning coal: for air quality and our atmosphere
- I know what is meant by the term 'biome'
- I can identify marine biomes and explain how these are affected by rising temperatures
- I can identify tundra biomes and explain how these are affected by rising temperatures
- I can identify savannah biomes and compare how Kenya and Spain are at risk from desertification

Useful vocabulary

biome
climate
rainforest
desert
savannah
woodland
grassland
tundra

energy
distribution
pollution
temperature
atmosphere
climate change
